

# Resources

OR-Alert (Website: [oralert.gov](http://oralert.gov)): To provide individuals, homeowners, and businesses alert notifications of fire, missing persons, and/or any number of hazardous situations that may impact their local area.

Watch Duty (Website: [app.watchduty.org](http://app.watchduty.org)): Provides notifications of wildfires in or near a person's residence or business. Includes coverage in OR, WA, CA as well as other States. The site also provides information regarding working fires including acreage, resources on site, percent of containment, and summary of fire behavior.

Genasys Project (Website: [protect.genasys.com](http://protect.genasys.com)) Similar to Watch Duty, covers the whole USA.

PulsePoint ( Website: [pulsepoint.org](http://pulsepoint.org)) Primarily a cellphone application: Notifies persons in a specific area of an emergency response. Primary purpose has been to alert citizens, with CPR skills, of a cardiac arrest near them (normally within ¼ mile) where they might be able to offer assistance and improve cardiac arrest survivability.

Trip Check (Website: [tripcheck.com](http://tripcheck.com)): Notifies travelers of road and weather conditions throughout the State of Oregon. Also provides a number of road cameras throughout the State.

Weather Alerts (Website: [inws.ncep.noaa.gov](http://inws.ncep.noaa.gov)): NOAA is just one site you can obtain customized weather alerts. Other sites to gain this information are [Weather Underground](#), [The Weather Channel](#), and others.
